Notes to the Condensed Consolidated Interim Financial Statements For the three months ended July 31, 2020 and 2019 (Expressed in Canadian dollars - unaudited)

1. Nature and continuance of operations

Standard Uranium Ltd. (the "Company") was incorporated in the province of British Columbia on November 20, 2017. The Company is engaged in the exploration and evaluation of resource properties. The Company's registered office is #918 - 1030 West Georgia Street, Vancouver, British Columbia, V6E 2Y3.

Following the filing of the Company's prospectus dated April 27, 2020, the Company's listing application to the TSX Venture Exchange ("TSX-V") was accepted and the Company began trading under the symbol "STND" on May 4, 2020.

These unaudited condensed consolidated interim financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. Different bases of measurement may be appropriate if the Company is not expected to continue operations for the foreseeable future. As at July 31, 2020, the Company has not generated any revenue and has incurred losses since inception. The Company's continuation as a going concern is dependent on its ability to generate future cash flows and/or obtain additional financing. These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. Management intends to finance operating costs over the next twelve months with cash on hand, loans from directors and companies controlled by directors and/or private placements of common stock. There is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These unaudited condensed consolidated interim financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. The Company's operations have not been drastically impacted by the pandemic. Management of the Company continues to monitor the situation and is following the protocols and rules set in place by the provincial and federal governments.

2. Significant accounting policies

These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34, Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB"). Accordingly, certain information and footnote disclosure normally included in annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") have been omitted or condensed, and therefore these unaudited condensed consolidated interim financial statements should be read in conjunction with the Company's April 30, 2020 audited annual consolidated financial statements and the notes to such financial statements.

These unaudited condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned subsidiary. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Inter-company balances and transactions, and any unrealized income and expenses arising from inter-company transactions, are eliminated in preparing the condensed consolidated interim financial statements.

The Company adopted the following new accounting standard and interpretation:

Amendments to IFRS 3, Business Combinations (effective January 1, 2020) assist in determining whether a transaction should be accounted for as a business combination or an asset acquisition. The flow-through shares were issued at a premium of \$0.02 per flow-through share, calculated as the difference in the price per flow-through unit and the price of a standard unit sold as part of the same offering, as tax deductions generated by the eligible expenditures will be passed through to the shareholders of the flow-through shares once the eligible expenditures are incurred and renounced.
